DETAILED ACTION

Status of the Application/Claims

1. In the amendment filed on 05/21/2007, Applicant has amended the claim 37. Pending claims are 34-40.

Terminal Disclaimer

2. The terminal disclaimer filed on 05/21/2007 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of U. S. Patent No. 6,692,744 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Maintained claim rejections

Claim rejections- 35 USC § 112

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. The rejection of claim 38 (and of the dependent claims 39 and 40) is maintained for the reasons of record. The Applicant arguments have been carefully considered but not found to be persuasive. Specifically, the Applicant tries to rebut the Office action by stating that: "... the Action argues that the effect of blocking inhibin/betaglycan could not have been predicted and that undue experimentation would be required to determine what effect inhibiting inhibin/betaglycan interaction would have a in any particular

Art Unit: 1647

disorder (i.e., any particular cell type)" (Remarks, page 4, lines 8-11). The unpredictability of the claimed treatment is caused by a lack of nexus between the conditions in need of treatment and the inhibition of the inhibin/betaglycan interaction. The Applicant's attention is drawn to the fact that the rejection was made because undue experimentation would have been needed to establish if the method of inhibition could have been used to TREAT developmental, skin, bone, hepatic, hematopoietic or central nervous system disorders. The office Action states that the specification is enabling for the reproductive disorders but not for the other disorders mentioned. Thus, the accent is put on the **treatment** of the disorders and thus on the **effects** of the potential inhibition of the formation of the inhibin/betaglycan complexes not on the experimentation needed to actually inhibit the formation of complexes. Therefore, the specification is enabling only for the use of the method only in reproductive disorders.

Conclusion

5. The claims 34-37 are allowable. Claims 38-40 are not allowed.

THIS ACTION IS MADE FINAL. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

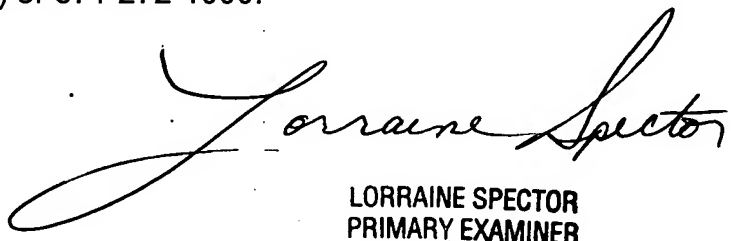

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
